DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 2, 3, 8-35, drawn to composition, classified in class 510, subclass 200.
 - II. Claims 41, 43-45, 47-49, and 53-58, drawn to a method of releasing an adherent, classified in class 134, subclass 22.14.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the process for using the product as claimed can be practiced with another materially different product, such as a conventional alkaline soap with warm water. Similarly, the product as claimed can be used in a materially different process, such as i.e. a water displacement agent or a lubricant.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Dale L. Rieger on March 10, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
